

Roll of the Draw

Game Design Document & Card Database (v1.0)

Document Type: Product Requirements & Content Manifest

Topic: Browser-Based Rogue-lite Deckbuilder Core Loop

Active Cards Database

Active cards are drawn into the hand (5 per round) and cost Energy (Max 3) to play. Their primary function is to physically manipulate the 5 dice on the table to engineer high-scoring poker hands before the score is submitted.

Active Cards: Nudges & Manipulations (1-10)

#	CARD NAME	TYPE	EFFECT DESCRIPTION
1	Nudge Up	Math	Add +1 to a selected die.
2	Nudge Down	Math	Subtract -1 from a selected die.
3	Flip	Logic	Turn a selected die to its exact opposite face (e.g., 1 becomes 6).
4	Re-roll Single	RNG	Re-roll one selected die on the board.
5	Re-roll All	RNG	Pick up and re-roll all 5 dice currently on the table.
6	Duplicate	Clone	Select a die, then apply its exact value to a second selected die.
7	Lock & Load	RNG	Lock 2 chosen dice in place, and re-roll the remaining 3 dice.
8	Max Out	Force	Force a selected die to instantly become a 6.
9	Bottom Out	Force	Force a selected die to instantly become a 1.
10	Evens Bias	RNG	Re-roll a selected die; it is guaranteed to land on an even number.

Active Cards: Utilities & Board Control (11-20)

#	CARD NAME	TYPE	EFFECT DESCRIPTION
11	Odds Bias	RNG	Re-roll a selected die; it is guaranteed to land on an odd number.
12	Wildcard	Logic	Change a die to a "Wild" face (automatically fills best poker hand).
13	Snake Eyes	Force	Select two dice; force both of them to become 1s.
14	Boxcars	Force	Select two dice; force both of them to become 6s.
15	The Squeeze	Math	Apply either +1 or -1 to ALL dice currently on the board.
16	Mirror	Clone	Copy the value of the far-left die and apply it to the far-right die.
17	Draw Two	Draw	Draw 2 additional cards from your deck into your hand this turn.
18	Energy Drink	Utility	Discard 1 card from your hand to instantly gain 1 Energy.
19	Substitute	Utility	Destroy 1 die completely and roll a fresh, new die in its place.
20	Clairvoyance	Draw	Reveal the top 3 cards of your deck. Choose 1 to draw into your hand.

Passive Upgrades: Jokers

Unlike Active Cards, **Jokers** sit on the table passively. They do not cost Energy to use.

Players are strictly limited to equipping **5 Jokers** at any given time. These items are the core "engine builders" of the game, applying massive multipliers, base chip bonuses, and economic advantages when specific dice or hands are scored.

Jokers: Dice & Hand Synergies (1-10)

#	JOKER NAME	TRIGGER	PASSIVE BONUS
1	The High Roller	Per Die	Grants +3 Multiplier for every '6' included in the scored hand.
2	Lowrider	Per Die	Grants +4 Multiplier for every '1' included in the scored hand.
3	Even Steven	Hand Rule	+50 Base Chips if the submitted hand contains exclusively even numbers.
4	Oddball	Hand Rule	+50 Base Chips if the submitted hand contains exclusively odd numbers.
5	Straight Shooter	Poker Hand	+12 Multiplier whenever a Small or Large Straight is scored.
6	Pair Bond	Poker Hand	Pairs and Two-Pairs grant a flat +20 Base Chips on top of standard score.
7	Three's Company	Poker Hand	The base score of any Three-of-a-Kind hand triggers twice.
8	Junk Dealer	Poker Hand	Scoring a standard "High Card" (no poker pairs) grants +300 Base Chips.
9	Royal Flush	Poker Hand	Five-of-a-Kinds grant a massive +500 Base Chips and +50 Multiplier.
10	Full House Fanatic	Scaling	+1 Multiplier. This bonus increases by +1 every time a Full House is played.

Jokers: Economy & Meta Synergies (11-20)

#	JOKER NAME	TRIGGER	PASSIVE BONUS
11	Energy Saver	Economy	Unspent Energy at round end yields +\$2 instead of the standard +\$1.
12	Card Counter	Hand Rule	+1 Multiplier for every Active Card held in your hand when scoring.
13	Discard Synergy	Hand Rule	+10 Base Chips for every card you played or discarded during this Round.
14	The Underdog	Score State	+20 Multiplier if your current score is less than 10% of the Round's target.
15	Rich Get Richer	Economy	+1 Multiplier for every \$10 you currently hold in your wallet.
16	Golden Die	RNG	One random die face becomes "Golden" per hand. Scoring it gives +50 chips.
17	Four-Leaf Clover	Utility	Grants +1 free total board re-roll per hand (costs 0 energy).
18	The Escalator	Scaling	+Multi increases by 1 for each consecutive hand played within a Round.
19	Stubborn Mule	Scaling	+5 Multiplier if you score the exact same poker hand type twice in a row.
20	The Scrapper	Economy	Immediately gain \$1 to your wallet every time you play an Active Card.

Implementation Summary

Database Integrity

All 40 entities detailed in this document adhere to strict state-management constraints, making them ideal for an AI-assisted React/Vite build.

- No complex physics bounding box collision required.
- Actions execute in a strict reducer flow: Play Card → Update Dice Array → Score → Apply Joker Synergies.
- Economy scales linearly alongside the 10-Round Target progression.
